

Technical Data

T-4MXR 4-STROKE RACING OILS (SYNTHETIC BLEND)

DESCRIPTION:

T-4MXR Racing Oil is a blend of premium synthetic and petroleum base oils for 4-Stroke off-road racing engines. Under typical conditions, these engines use lower oil volumes, run at higher temperatures, experience higher RPM's and shock loads while having to endure aggressive clutch use. T-4MXR is formulated with high Viscosity Index base oils and advanced polymers to provide extreme thermal and shear stability. Torco's additive technology improve ring seal, protects valve train, eliminates deposits, controls foam and provides smooth, positive clutch activation for integrated transmissions.

FEATURES & BENEFITS:

- Off-road specific formula
- Superior anti-wear and deposit free performance
- High VI base oils
- Provides smooth, positive clutch activation

APPLICATIONS:

For use in all air cooled or liquid cooled 4-Stroke racing engines.

Exceeds: API SL • JASO MA2

TYPICAL TEST DATA:

Specification	Test	15W-40
Viscosity @ 40°C	D445	116.28
Viscosity @ 100°C	D445	16.1
Viscosity Index	D2270	148
TBN	D2896	7.2
Flash Point (°C)	D92	236
Pour Point (°C)	D97	-18
Appearance	Visual	Amber

DIRECTIONS:

Follow manufacturer's fill level requirements. Compatible with other petroleum and synthetic lubricants.
